JANUS CREATIVE SERIES

JANUS SERIES

Janus is believed to be the god of beginning and end, future and past, god that has power over time. In janus series, there are 2 designs of leg part, slant and straight style. Both style are inspired by the janus god which has 2 faces. Straight style represent the modern and simplicity which fit perfectly with carbon black matted surface. On the other hand, slant style is also well designed to outstandingly match with special oblique cut top. Timeless is how we describe janus series. Not only a perfect design but also its solution that has developed to enhance the usage with simplicity yet elegant
